Semi-Monthly Crop Report of Alberta

A survey of crops on June 15th gave generally favourable conditions for the stand of crop throughout the province. This was subject to such limiting factors as cutworms in rather wide distribution over the province but causing damage to the extent of 5 per cent. of the crop in only a few localities, chiefly in the southern part of the province and a more serious general limiting factor represented in the persistence of drying winds extending from the boundary to Edmonton but being worst in the area swept by the strong chinook through Macleod and the country north as far as High River and south to the boundary. The effect of the rapidly drying winds was necessarily much greater on land other than summer fallow. Time has already shown backward to the point of promising less than half a crop.

Since the middle of the month the change in conditions has been unfavourable. Briefly stated it may be said that crops in the north, which means the Peace River country, have been making good progress due to a good seeding, strong germination and a sufficient supply of moisture since. Crops in the centre of the province corresponding with the Edmonton district have been holding out against the limited rain supply and while this area is not facing any prospect of failure or reduction to a seventy per cent crop the dry weather has been sufficient to cut away a good deal of leaf growth, checked the stooling and shortened the heads where the grain is shooting out. The condition of the crop may be said to be not quite as good as it was two weeks ago but the unfavorable seasonal conditions have not got to the point of bringing anything approaching disaster except along the eastern side.

Early crops have been shortened and late sown crops are slow and uneven in coming up but there is no condition of exhaustion of moisture.

The time has not gained any in the past two weeks, rather the reverse.

In Southern Alberta, that is, south of Red Deer, the unfavorable seasonal conditions have had a more serious effect. This does not apply to the Red Deer country itself, or to the country south through to Innisfail. Olds, Bowden and Didsbury to any marked extent, though the scarcity of rain has been felt to be the chief limiting factor against a good normal crop even here. The effect of the drought as it appears from north of Carstairs, in the south of the Province, has been sufficient to burn the crop in patches. Some of it is already red and dry on the knolls and cannot very well come back even with the assistance of copious rains.

It may be said that from north of Carstairs to the International boundary and extending practically from Pincher Creek to the Saskatchewan line the injury is rather marked every place, and in some localities has gone to the point of causing failure.

There are good stands of grain along the main line of the C.P.R. around Calgary, Gleichen, Cluny, Bassano and other points. The crop has been put in in good time. The land has been in good condition. There is a good stand of grain at Gleichen and at most points east to within thirty or forty miles of Medicine Hat. At nearly all of these points the crop shows red patches, but the main line of the C.P.R. has the best of the crop resources of the south country this year in the district below Carstairs. There is some good crop running south of Calgary but the effects of drought appear rather quickly. From High River to Macleod (Continued on Page 6)

Want to Build New School

A meeting of a few of the ratepayers of the town was held in the Opera House on Monday night to discuss the question of more school accommodation as the present building is now taxed to its capacity, and when the fall term begins, if the High School is to be continued, more room will have to be found for the new pupils. There were 37 High School pupils last term and it is estimated that there will be at least 52 starting next term. There were 262 pupils attending public school at end of term.

Mr. H. B. Atkins, M.L.A., was chairman of the meeting and Mr. Aylesworth, Inspector of this school district was present on behalf of the Department of Education, in place of Mr. Smith, High School Inspector who intended to be present but was unavoidably detained elsewhere.

The chairman after explaining the reason for the meeting called upon Mr. Aylesworth, who in a short but concise speech put the matter very plainly as to the advantages of a High School, but he said he was not there to dictate to the ratepayers. He spoke of the grants that the Government made to the High School which was \$1 per day for each room and a special grant of \$75. The Government at its last session had increased this and had doubled it if the regulations of the Department were carried out. He said as far as the public school was concerned they had to have more accommodation and more teachers as it was a physical impossibility for a teacher to handle 52 pupils in one room. The average should be about 35 to do good work. He spoke of putting on an addition to the present school, which in his estimation would not be advisable, or building a four-roomed school with basement with hot water heating system. He had received rough estimates for the latter building which would cost from \$12,300 to \$13,000 to build.

Quite a discussion ensued and the feeling was that under no circumstances should the High School be dispensed with. H. E. Osmond took the stand that considering the financial circumstances in which both the School Board and the town were in at the present time, because of the neglect of one of the largest taxpayers in the town (a land company) to pay their taxes, the current finances of the town did not permit of large expenditures but suggested that some temporary arrangement be made for a year or two until this matter was straightened out. He was very strongly opposed, however, nearly all being in favor of going ahead and making permanent arrangements at once.

Those who took part in the discussion were N. Clarke, H. W. Chambers, Parker R. Reed, F. Moyle, Dr. Evans, E. Shantz, M. Clemens, J. M. Reed, J. Ruby, S. Miller, and J. D. Anderson.

The big point was made that it would be impossible to make temporary arrangements as no suitable building could be secured.

At the end of the meeting a resolution was presented authorizing the School Board to go ahead and take the necessary steps to provide more accommodation. If they decide that a new building will have to be provided a by-law will be submitted to the ratepayers for their sanction. The resolution carried by a vote of 24 to 2. The two opposing being Mr. S. Miller and H. E. Osmond.

Wonderful Strength For Weak Stomachs

Everyone Talking About the
Cures Made By Dr.
Hamilton's Pills

There are despairing men and women by the thousands in this city, whose stomach keep them in constant misery that can be quickly restored to vigorous health by Dr. Hamilton's Pills.

We know of no other medicine that possesses such power to kindle into new life the exhausted energies of chronic stomach sufferers.

There is an extraordinary power in Dr. Hamilton's Pills that searches out the weak spots, that braces up the delicate glands and complex workings of the stomach and bowels.

There are invigorating, stimulating, tonic ingredients in Dr. Hamilton's Pills which are derived from powerful juices taken from rare herbs and roots, and these are scientifically combined with other medicinal products so as to assist in a harmonious and proper working of the entire system.

The ingredients of Dr. Hamilton's Pills, coming from the great storehouse of Mother Nature herself, can be relied upon to be harmless. Guaranteed results follow to all who use Dr. Hamilton's Pills for Stomach Weakness, Gas, Sourness, Headache, Biliousness or Constipation.

Seekers of the better health can not do better than invest 25c in this health-bringing family medicine.

Hawker's Career

Record as an Aviator Is One of
Astounding and Almost Un-
interrupted Success

Harry G. Hawker's career as a pilot, covering nine years, has revealed an ability to draw a line between sheer recklessness and prudent daring which has been at once the amazement and despair of his fellow flying men. Perhaps the secret of it is that what would be recklessness in another has in his case simply been good craftsmanship, because of his consummate skill and wonderful nerve and physical vitality. His record as an aviator is one of astonishing and almost uninterrupted success.

Hawker was a lad in Australia, his native land, when flying was in its infancy in England. His natural tastes turned him to motor-engines, and his love of adventure carried him to England in company with a half-dozen other young Australians. Two at least of his companions gained distinction in the land of their adoption. These were Lieut.-Col. Harry Bustard and Major Eric Harrison, who became aviation officers.

The boys brought their savings in their pockets and, once in the motherland, sought employment as mechanics. Hawker speedily found a berth with T. O. M. Sopwith, then just starting as a builder of airplanes. Hawker proved himself a skilful mechanic and a lad of intelligence, and Sopwith, needing pilots, taught him to fly.

His development thenceforth was rapid. Having found his wings, he began to gain advertising for his employer and himself by going after the prizes which were beginning to be offered. On October 24, 1912, in a Sopwith biplane patterned after the American Wright machine and powered with a 40-horse-power A.B.C. motor, he won the Michelin cup by setting a new endurance record of eight hours and twenty-three minutes in the air.

On May 31 following, in a Sopwith with an 80-horse power Gnome engine, he established a British altitude record of 11,450 feet. Two weeks later, with a passenger, he soared to 12,900 feet. On the same day, he took up two passengers to 10,600 feet, and on July 27, three, to 8,400 feet. All of these were new British records.

The big cash prize for the moment was that of \$25,000 offered by the London Daily Mail for a seaplane flight around Great Britain to be completed within seventy-two hours. Twice Hawker started after this money. The first time he failed through illness, and the second his machine went wrong after he had skirted the north coast and worked down as far as Dublin.

Early this year Hawker was credited with an altitude flight of nearly 30,000 feet, beating his 1916 record of

28,500 feet. This record, however, has not been authenticated.

During the war Hawker was a testing pilot for Sopwith, whose planes shared with the Bristol machines supremacy on the British front. As a test pilot it was his duty to take up battleplanes for their final try-out before they were turned over to the government. He received \$125 for each flight, and it was not unusual for him to make twelve a day. For the last three years he has been the highest paid aviator in the world, his income during that time being reported to have been upward of \$100,000 a year. He lives on a comfortable scale at Kingston-on-Thames, where he has a wife and six months' old daughter. He owns three Rolls-Royce cars, in itself an evidence of prosperity. The World correspondent at St. John's wrote of Hawker some time ago:

"Here he has given no evidence of great income. He dresses almost indifferently, sometimes wearing a lounge suit whose most striking detail is trousers with extreme peg tops, sometimes wearing khaki riding breeches, with gray golf stockings. He seldom appears without a cap whose visor is drawn far forward and makes him still more boyish in appearance. He doesn't look a bit more than his thirty-one years at any time."

"His relaxations while in St. John's have been boyish. Almost nightly he took part in what his party called 'rag'—some bit of good horseplay. One night, after a scuffle, the bed of Capt. Michael H. Fenn, business manager of the trans-Atlantic expedition, was filled with crumbled dog-biscuits. Another night the party invaded the room of Lieut. Lawrence Clement, meteorological officer, and snowballed him till he cried for mercy."

"On still other nights he went to motion-picture shows. The last picture he saw was one by Theda Bara, whom he thought a very bad actress. He and others of the party have received not a little social attention and have often gone out for tea."

Com. Mackenzie Grieve, R.N., Hawker's navigator, has had far less of the limelight in his life than Hawker, yet in his line of endeavor he is a man of attainments. He is 28 years old, a wireless expert and a meteorologist, as well as a flier. For a time during the war he commanded the cruiser Campania, mother ship of the British air squadron with the Grand Fleet.—New York World.

Mystery Of The Sea Has Been Solved

Given Up For Lost, Reaches New
York

Three months after the fifty-year-old Norwegian bark, Superior, became a "mystery of the sea," by disappearing off the Island of Bull in the Malay Archipelago, on a voyage from Manila to New York, the vessel arrived in New York May 20, with her captain unaware that his ship had been given up for lost. The crew was recruited in San Francisco before the ship sailed from that port for the Philippines in December, 1918.

Captain Hansen explained that after he and the crew, believing the Superior was going on the rocks, put out in two lifeboats, the wind veered and his own boat returned to the ship. Meanwhile the mate and six of the crew went ashore and, believing the vessel had been lost and that the captain and other members had perished, sent a cablegram to the Norwegian American Trading Company, New York, charterers of the vessel, saying that "it is a mysterious case." A search by government authorities in the Philippines failed to locate the vessel.

Cap. Hansen thought the mate and his six companions were drowned. Prior to her "disappearance" the Superior had landed at Manila a cargo of hemp and sugar taken on at San Francisco.

Fiume and St. Vitus

Fiume, which has been responsible for a nerve tension at the peace conference, is oddly enough associated with the cure of nerve troubles. It was once called Vitopolis, because specially renowned for the cult of St. Vitus, the boy martyr invoked for the healing of nervous disorders, particularly the chorea, named after him "St. Vitus's dance." The present name of this coveted port is abbreviated from the long Italian title, which means "the river that flows past the face of St. Vitus."

SAT UP IN BED TO GET HER BREATH

Palpitation of the heart, shortness of breath, inability to lie on the left side, feelings as if smothering, oppressed feeling in the chest, dizzy and faint spells, tired, weak, worn-out feeling, involuntary twitching of the muscles, sleeplessness, restlessness, etc., all point to the fact that either the heart or nerves, or both, are not what they should be. Any of these conditions should be remedied immediately so as to avoid a complete breakdown of the whole system.

Milburn's Heart and Nerve Pills will bring energy to the weakened constitution, strengthen and regulate the heart, and tone up the tired, overstrained nerves.

Mrs. William Steves, Chelmsford Road, N.B., writes: "I have been a great sufferer from nerve troubles and palpitation of the heart, which was so bad I had to sit straight up in bed to get my breath. I could not lie on my left side at all. I tried doctor after doctor, also several different remedies, but got no help from them. My mother insisted on me trying Milburn's Heart and Nerve Pills. By the time I had used one box I was feeling very much better. I took in all three boxes, and now I am in perfect health and can enjoy a good sound sleep, and can lie on my left side without any trouble."

Milburn's Heart and Nerve Pills are 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Flu Epidemic Hits Labrador

Dogs Devour Bodies Because No One
Left to Bury Them

St. John's, Nfld.—An official investigation of the influenza epidemic in Labrador, where several villages are reported to have lost a majority of inhabitants, was ordered upon receipt of Archibald Picott, minister without portfolio in the Newfoundland cabinet, of messages detailing the ravages of the disease.

"The information was to the effect that all men in the village of Okak had died of the disease and that only 60 women and children had survived. Many of the bodies were devoured by dogs because there was no one to bury them."

At Habron only five women and seven men survived.

"Black Watch"—The Best Black

Amendments to the Civil Service Act

Ottawa.—"It is the intention to ask parliament during the present session to pass the proposed amendments to the civil service act bringing into effect at once the new classification of the civil service," said the Hon. A. K. MacLean in answer to an inquiry as to whether there was any truth in the report that the classification was to be held over until next session.

He also said that the proposed amendments to the civil service act provided machinery by which changes in the classification could be easily made and without waiting for another session of parliament.

The Biggest Mummy

The largest mummy in the world is that of an animal, the Beresovka mammoth, in the Petrograd museum. The species has been extinct for thousands of years, and the Beresovka mammoth—which was found embedded in the frozen earth near the Beresovka river, in northeast Siberia—probably lived fifty thousand years ago.

Weekly Holiday for Postmen

Toronto.—The Dominion government has conceded to the postal employees the 44-hour week, and accordingly a half holiday will be given to them the year round, the half holiday to fall on Saturday afternoon as far as possible.

DO YOUR EARS RING? HAVE YOU CATARRH?

A buzzing noise in the head is the beginning of chronic Catarrh. If not checked the result is deafness. A simple remedy that many physicians advise is to slowly inhale Catarrhazone a few times each day. The soothing vapor of Catarrhazone cures the Catarrhal condition, and hearing improves at once. Head noises, buzzing ears are cured. For Catarrhal deafness, throat, nose and lung Catarrh there is probably no remedy so efficient. The large one dollar outfit lasts two months and is guaranteed; small size 50c; trial size 25c. Sold everywhere by dealers, or The Catarrhazone Co., Kingston, Ont.

Americans Fight Under British Flag

Largest Body of Men Ever Enlisted
for War Under Foreign
Colors

Now that the Americans who volunteered with the British forces are being brought together in England for repatriation, it seems likely that the number of these recruits was far in excess of the 20,000 at which it has been estimated. It will not be surprising if this volunteer army, whose individuals fought under the British flag wherever it fronted an enemy, reached a total of 100,000. Some enlisted in 1914, and the number grew from year to year. Whatever the final estimate, the Americans in British service made undoubtedly the largest body of men ever enlisted for war under another flag than their own. And now, for many of them, it is quite a long and serious business to secure the papers that will prove to port officials at home that they are not immigrants.—Christian Science Monitor.

Hun Officers True To Form

Shot Their Own Men When They
Attempted to Save Ships
From Sinking

Thurso, Scotland.—German sailors were shot by their own officers when they attempted to obey the commands of the British officers to return to their ships and shut the scacocks.

This statement was made by Lieut. Nuttall, of the steamer Alouette, which has reached here from Scapa Flow, where the German ships were sunk.

"I pulled alongside a German destroyer when I saw the ship begin to settle," said Lieut. Nuttall, and ordered Germans back to close the scacocks. "Four or five of them turned, whereupon the German officers shot three of them dead. We then opened fire on the officers and several of them fell. Others among the Germans then returned and closed the scacocks. The Germans were also driven back to four or five other destroyers; they closed the scacocks in time to keep the vessels afloat."

Lieut. Nuttall reports that the Emden had been pumped out and is now afloat. The Baden's crew were forced back to that vessel and compelled to shut the scacocks.

"Directly the first red flag and German ensign were hoisted on the first battleship," he added, "the German admiral put off in a motor boat post-haste to the British air station ashore. He stated that the German ships were sinking and requested assistance for the crews. The admiral was arrested. Naval men believe that the trip was a ruse to lead to the belief that the crews were taking charge of the ships. This, however, was not substantiated by what actually happened."

The World's Shipbuilding

The Tonnage Under Construction in
the World

London, England.—Returns compiled by Lloyd's register of shipping shows that at the close of the quarter ended March 31 last the tonnage under construction in the world reached 7,796,266 tons gross, of which 2,254,845 tons was in the United Kingdom.

Of the tonnage building abroad, the United States has over 75 per cent, viz., 4,185,523 tons. Then follow the British dominions, 303,000; Japan, 254,835, and Holland, 182,308. Only four other countries have over 100,000 tons of shipping in their yards.

The United Kingdom figures are about 500,000 tons higher than those for June, 1914, while the wonderful development, due to the war, in the shipbuilding industry in the United States is shown by the fact that the tonnage now under construction in that country is more than 28 times the tonnage building in June 1914.

London Aerial Derby

The revival of the London Aerial Derby was won by Captain Gathergood. The winner made the flight of two circuits of London, aggregating 190 miles, in 87 minutes and 45 seconds. His average speed was 140 miles an hour. The best previous time was made by Hameline in 1913, when he flew at an average of 76 miles an hour. The race has not been contested since 1914.

W. N. U. 1270

THE POLICE FORCE OF THE BODY

DAY and night—without ceasing—a struggle is going on in your body between the germs of disease and the white blood corpuscles—the police force of the human body.

If this police force weakens, disease germs gain a foothold—sickness follows.

Constipation is the most common and dangerous way of corrupting the human police force. Food waste remains too long in the intestines—decays—poisons the blood—and opens the way for attack by the germs that cause tuberculosis, diphtheria, pneumonia and a multitude of other ills.

The culpable habit of using salts, pills, mineral waters, castor oil, etc., to force the bowels to move, makes this condition even worse, as constipation returns almost immediately.

Nujol is entirely different from drugs as it does not force or irritate the bowels.

Nujol prevents stagnation by softening the food waste and encouraging the intestinal muscles to act naturally, thus removing the cause of constipation and self-poisoning. It is absolutely harmless and pleasant.

Nujol helps Nature establish easy, thorough bowel evacuation at regular intervals—the healthiest habit in the world.

Get a bottle of Nujol from your druggist today and keep your police force on the job.

Warning: Nujol is sold in sealed bottles bearing the Nujol Trade Mark. All druggists insist on Nujol. You may suffer from substitutes.

Turks Drive Out Greeks

Outnumbered Four to One, Greeks
Are Retreating Before the
Turkish Forces

Paris.—The situation in Asia Minor is serious, according to official dispatches received by Reuter's Limited here. These advices stated that the Turkish forces outnumber the Greeks four to one and threaten to drive the Greeks entirely out of Asia Minor. The Greek forces are reported to be retreating before the Turks, who are supplied with good artillery and plenty of ammunition.

GIRLS! WHITEN YOUR SKIN WITH LEMON JUICE

Make a Beauty Lotion for a Few
Cents to Remove Tan, Freckles,
Sallowiness

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowiness, redness and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

WEDNESDAY, JULY 9, 1919.

Let the People Know

It will be a surprise to a good many ratepayers to know that a nomination day was held last week to fill vacant positions on the Council and School Board. As might have been expected there were only two or three ratepayers present, but fortunately good men were secured. Mr. H. W. Chambers was induced to go on to the Council again and Mr. Norman Clarke on the School Board.

Another important meeting of school ratepayers was called for Monday night to discuss the very important matter of providing more school accommodation but a little different procedure was followed for this meeting, inasmuch as a few typewritten notices were sent out for the meeting.

This old backwoods village method of calling important meetings of our public bodies is out of date, if we wish to be progressive. Full publicity should be given of these meetings so that there can be no excuse for the ratepayers not showing an interest. It is true that there is a deplorable lack of interest in public affairs by the average taxpayer in this town, but by the procedure followed in these two cases it is not to be wondered at that so little interest is shown. If all these meetings were properly advertised our governing bodies would not be to blame if the ratepayers did not attend.

Better Babies' Conference

The Provincial Health Department has arranged a better babies' conference to be held at the Edmonton Exhibition, which opens on July 8th. Babies from six months to six years of age will be accepted and no entry is required. The mothers are requested to take their babies to the Public Health Exhibit and arrange for an appointment. Five doctors and seven nurses have been arranged for, and the babies will be examined as to mentality, development and physical condition generally. This is not a baby beauty contest. The mother of every physically normal child will receive a certificate from the Provincial Health Department stating that the child has been passed as physically fit; the mothers of defective or ailing children will receive a card showing just what is wrong with their babies, so that they can take necessary means to correct defects or arrest the progress of disease; if necessary, they will be advised to consult their own doctors for advice and treatment. All mothers are cordially invited to take advantage of this opportunity to have their children examined by specialists for which no fee is charged.

The attitude of the G.W.V.A. towards party politics was amply demonstrated in their declining an invitation issued by D. D. McKenzie, the liberal leader, to send delegates to the national convention at Ottawa, in August. With very little discussion, a resolution was passed "That a copy of the Association constitution be forwarded to Mr. McKenzie." The G.W.V.A. is non-political and we believe in that way can best serve the interests of its members.

Calgary Fair Big Success

A very large number of people from this district took in the Fair at Calgary last week and they are all considering it the best that has ever been held. The splendid exhibits of live stock were a great attraction but we believe that one of the best exhibits in these classes were missed by a great many people and that was the sheep and goat classes. The Karakule sheep and lambs and the goats being especially attractive. The amusement end of the Fair was perhaps a little overdone as far as the attractions outside of those in front of the grandstand were concerned. The great Sousa and his splendid band were well worth all the money it cost to get in to hear them and the other grandstand attractions were certainly of a high standard. The splendid new practically fireproof grandstand was a surprise to a great many people, and when the Exhibition Association get through with the plans they have in hand for other changes they will have the best Fair grounds in the west. It would not be right to ignore the flying stunts put on every day by Captain McCall of Calgary and Captain May of Edmonton. These men gave a splendid exhibition every day of what real flying means and their control over their machines was marvellous and demonstrated fully the big progress that has been made since the beginning of the great war.

The big British dirigible airship the R-84, reached the end of its long journey from East Fortune, Scotland, to Mineola, N. Y., on Sunday. This airship travelled 3,600 miles in 108 hours, or a little over 33 miles an hour.

Hooray! The Red Wagons Are Coming

After an absence of several years due to the war, the small boys and kiddies of Didsbury are at last to see a big show. Sangers' Greater European Shows will visit Didsbury Monday, July 14th, giving two performances. Already some of the "older boys" are looking about for their stray nephews and neices saying they will probably have to go and carry the children to see the animals. But deep down in their hearts they know they would not miss the big show if there were not a small boy within a thousand miles of Didsbury circus day.

Many new and novel acts are featured this season by the Great Sanger Shows. The St. Leon family of acrobats, the Silverton trio of wire walkers, the Siegrist sisters, daring and intrepid, aerialists, and the Holland troupe of riders will be seen. To delight the hearts of the little folks there will be upwards of a score of highly trained Shetland ponies, monkeys and dogs, along with a congress of clowns headed by Harry La Pearl, the veteran jester. Eddie Lewis, the champion middle-weight wrestler of England, will appear twice daily, meeting all comers in a friendly catch as catch can wrestling match.

There will be performances at 2 and 8 p.m., the doors opening an hour earlier to permit a concert of popular and operatic music by Prof. Carl Clair and his military band. A series of free exhibitions will take place on the show grounds at 1 and 7 p.m.

Profiteering In Canada

While not proposing in this article to even attempt to define the causes or contributing agencies to the excessive profiteering which has been and is still rampant in Canada, and also while not attempting to assume responsibility for suggesting the nature of the remedy that should be applied, it can be said without any hesitation or qualification whatever that the Government at Ottawa must act, act quickly, act even drastically, to put a stop to the extortionate profiteering in the necessities of life which has become not only a national scandal, but is so outraging the feelings of the people that a situation is developing which constitutes a serious menace to the future stability of the Dominion.

The cost of living has now reached a height where even men of moderate incomes are beginning to worry how to make ends meet, while the man on small salary and the workman depending on his daily or weekly wage is becoming almost desperate in his struggle to feed, clothe and keep a roof over the heads of himself, wife and children.

There can be no question, of course, that it was not possible for the civilized nations of the world to turn their activities and energies for four and a half years, from the work of peaceful production and trade, into the terrible business of war and wholesale destruction of life and property without such loss in production, and destruction of existing wealth and property, having the effect of increasing the cost of all articles that were made and produced. Under the circumstances, an increase was natural and inevitable, and, if there were no other artificial contributing causes, the people would grin and bear it as one of the prices of victory and the securing of the future liberty and peace of the world.

Unfortunately, however, selfish interests, lacking the first elements of patriotism in their make-up, took advantage of the world upheaval and the necessities of their country and all mankind engaged in a life and death struggle for their very independence and existence, to control and manipulate the life necessities of the masses of the people in such a manner as to pile up enormous profits and wealth for themselves. These men and corporations took full advantage of the abnormal conditions existing to accumulate abnormal profits for themselves, utterly oblivious of the effect on their fellow citizens and country.

These soulless individuals and corporations did this at a time when all the energies and thought of the Government were centered on the tremendous task thrust upon it of prosecuting the war to a victorious end, and when it was, therefore, no easy matter to keep a close check upon their operations.

The war is now over and won, ending in a triumphant victory for democracy, civilization and human rights and liberty. It is, therefore, now the

first and chief business and duty of the Government of Canada to grapple with this problem, put a stop to all excessive profiteering, and bring down the cost of living in this country. It can be done. It must be done. If it is not, the outlook for Canada is far from bright.

A year or so ago the profiteering of the pork barons and meat packers was disclosed to the public gaze and shocked the moral conscience of the whole country. Within recent weeks the Parliamentary committee at Ottawa inquiring into the high cost of living has dragged into the open light of day the extortionate profiteering in which many of the big corporations of Canada have been engaged, and which has enabled them to pile up profits ranging all the way from 70 to 300 per cent. These profits have been made by the meat packers, the flour-milling companies, the manufacturers of clothing—in a word, the dealers in those articles which all the people must buy in order to live.

This selfish and extortionate accumulation of great wealth by the few at the expense of the many is one of the chief reasons for the high cost of living today which is driving men and women to desperation, and creating such a feeling of unrest and discontent that they are all too ready to act upon the advice and suggestions of extreme Socialists and agitators of all kinds, many even being willing to go to the length of revolution against all constituted authority.

It is not sufficient that Parliament should succeed in definitely exposing these evils, and thus confirm what the people have long suspected. There must be action by the Government to end these evils. Unless such action follows swiftly upon these disclosures more harm than good will have been done, because the feelings of unrest are being intensified by the facts made known. The Government must act, and act quickly.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and an entire cessation of manifestations of internal trouble.

Promises that are hardest to obtain are surest of fulfillment.

It Works! Try It

Tells how to loosen a sore, tender corn so it lifts out without pain.

Good news spreads rapidly and druggists here are kept busy dispensing freezine, the other discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers.

Ask at any pharmacy for a quarter ounce of freezine, which will cost very little, but is said to be sufficient to rid one's feet of every hard or soft corn or callus.

You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so shrivelled that it lifts out without pain. It is a sticky substance which dries when applied and never inflames or even irritates the adjoining tissue.

This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corns.

Canadian Wheat Condition Good

Ottawa.—A bulletin issued by the Bureau of Statistics places the total area sown to wheat in Canada this season at 16,958,500 acres, compared with 17,353,902 acres in 1918. The area sown to spring wheat is 16,160,750 acres, or 776,537 acres smaller. The area of oats is estimated at 14,564,000 acres, or 136,000 acres less than in 1918.

The average condition as of May 31 follows: Spring wheat 98, compared with 96 in 1918; fall wheat 101, compared with 75; all wheat 98, compared with 90; oats 95, compared with 100; barley 95, compared with 98; rye 101, compared with 94.

Clemenceau's Work Done

Paris.—Premier Clemenceau has expressed his intention to resign from office as soon as the treaty is promulgated, feeling that he has accomplished the task for which he assumed the premiership, says Marcel Hutin in the Echo de Paris. It is expected that parliament will ratify the treaty late in July.

FATEFUL YEARS FOR ALL WOMEN

How Best to Overcome the Troubles That Afflict Women Only

The most fateful years in a woman's life are those between forty-five and fifty. Many women enter this term under depressing conditions through overwork, worry or a neglected condition of the blood, and so they suffer heavily. Still, variations of health at this time can be relieved by home treatment.

Among the commonest symptoms are headaches and pains in the back and sides, fever-flushes, palpitation, dizziness and depression. Women stand in need of rich, red blood all their life, but never more so than in middle age, when the nerves are also weak and overwrought. Now every woman can prove the prompt help afforded to her health by renewing her blood supply. It is a test that any ailing woman can make by taking Dr. Williams' Pink Pills, for these pills make rich, red blood, which in turn helps the appetite, strengthens the nerves and restores robust health. Thousands of women have found in Dr. Williams' Pink Pills the means by which new health and a brighter outlook of life were gained. In proof of this is the voluntary testimony of Mrs. H. S. Peterson, Milford, Ont., who says: "I have suffered greatly from those troubles that afflict my sex, and I have found that Dr. Williams' Pink Pills in such cases not only do all that is claimed for them, but more. Dr. Williams' Pink Pills have done so much for me that I urge every weak woman to try them, and they will soon realize the great difference in one's health they make."

If you suffer from any of the ills that particularly afflict womanhood, you should avail yourself at once of the health help of Dr. Williams' Pink Pills. You can get them from any dealer in medicine or by mail post paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Public Ownership

Visitor (in public gardens, interested in botany): Do you happen to know to what family that plant belongs?

Old Gardener: I happen to know it don't belong to no family. That plant belongs to the park.—Florida Times-Union.

Locating Prisoners Of War

Sixty Thousand More French Prisoners Located in Germany

Paris.—German figures on the number of French prisoners held in Germany were found to be incorrect, Leon Abrami, under-secretary in the ministry of war, announced in the chamber of deputies. More than 60,000 French prisoners in excess of the German figures were found in Germany. The number of French soldiers missing in action has reached 314,000, the under secretary said.

The bodies of the majority of the missing, he added, it would be impossible to find. Inter-allied missions were searching Germany to ascertain if any prisoners still remained there.

Reading tiresome poetry when you are sad is equivalent to reading a cookbook when you are tired.

Film Company To Tour Canadian Rockies

Filming About Twenty-Five Hundred Feet of Our Canadian Resorts

Word has been received in Winnipeg that the Fred Stone Film Company of Los Angeles, Cal., a party of fifteen people, are in Vancouver en route to Lake Louise, Banff and other Canadian Rocky resorts, for the purpose of filming western story which will include about twenty-five hundred feet of our Canadian resorts.

This story will be an all-Canadian production, and will be shown when released, throughout the United States, Canada and Europe.

This is the first time a film company has ever attempted to stage a film at any of our beautiful resorts in the Rockies, and will be looked forward to with great interest by those who have seen and visited these resorts, and with wonder by those who have yet to see such magnificent scenery as our Canadian Rockies afford, surpassed nowhere in the world.

Minard's Liniment Cures Diphtheria.

Growth of Railroads

The capital liability of Canadian railroads, as stated in the Canada Year Book for 1918, has grown from \$716,445,134 in 1876 to \$1,985,119,991 in 1917; the passengers carried, who numbered 5,190,416 in 1875, were 53,749,680 in 1917, and the freight carried annually has increased from 5,670,836 tons in 1875 to 121,916,272 tons in 1917. Gross earnings, which in 1875 were \$19,470,539, were \$310,771,479 in 1917.

Nights of Agony come in the train of asthma. The victim cannot lie down and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

A young man who was fired with love says he thinks it was the girl's father who acted as fireman.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

Pack Eggs for Winter

Eggs can be packed now for next winter's use. G. E. Greaves, with the Extension Division, North Dakota Agricultural College, found that one locality that shipped out 150 cases of eggs in the summer had 75 cases shipped back in the winter when the price had nearly doubled. This was poor economy and could have been largely avoided if some of the eggs had been packed. Any housewife can procure waterglass from the local drug store, and by following instructions she can pack enough eggs during the summer months to last her through the winter, and at a very small cost. Other preservatives can be used, such as lime, salt, or lime and salt, but waterglass is cleaner.—North Dakota Agricultural College.

Minard's Liniment Cures Colds, Etc..

Farm Working Hours in Scotland

A notable conference has taken place between representatives of the National Farmers' Union and of the Farm Servants' Union. The result is an agreement, the final meaning of which must be the greatly enhanced cost of food and clothing. The main element in the agreement is that from Whit Sunday, 1919, the working day on farms shall be one of nine hours' duration. The nine hours are to reckon from stable to stable, and are not to include stable work or meal hours. The average working week is to be a week of 54 hours—and overtime, worked in seed-time and harvest, is to be paid at overtime wages. Holidays are to number 21 in each year, or there are to be 42 half-day holidays.—Scottish Farmer.

The oldest living thing in the world is thought to be the famous cypress in the churchyard of the village of Santa Maria del Tule, a few miles from Mexico city. Experts have estimated its age as between five and six thousand years. It is said to have been a striping two hundred years old when Cheops built the great Pyramid.—Exchange.

Buy Cuticura Soap When You Buy A Safety Razor

And double razor efficiency. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily. After shaving touch spots of dandruff or irritation, if any, with Cuticura Ointment. Then bathe and shampoo with same cake of soap. One soap for all uses. Rinse with tepid or cold water, dry gently and dust on a few grains of Cuticura Talcum and note how soft and velvety your skin. Absolutely nothing like the Cuticura Trio for every-day toilet uses. Soap to cleanse and purify, Ointment to soften and soothe, Talcum to powder and perfume. Sample each free by mail. Address: "Cuticura, Dept. N, Boston, U. S. A."

The Tale Of A Toad

London, England.—A correspondent of the Morning Post writes that at the Netherdale Colliery, Burton-on-Trent, a toad has been found buried in a coal seam 200 yards beneath the surface and a mile from the pit shaft. When a miner's pick struck into the pocket of clay out rolled the toad. Three inches in length, with skin like that of a young alligator, it has no mouth, but it is evident it once possessed one, though the aperture is now sealed up. It is recovering its sight and moving about.

All some women talk about is—well, about eighteen hours a day.

The System is Poisoned

By Failure of the Liver and Kidneys to Purify the Blood
Relief Obtained by Use of Dr. Chase's Kidney-Liver Pills.

Too much eating of heavy, highly-seasoned foods and too little outdoor exercise are the most frequent causes. The liver is upset, becomes torpid and inactive, the bowels are constipated, the kidneys are overworked in an effort to get rid of the accumulating poisons and breakdown, headache, backache, aching limbs sound a warning note, and when this is not heeded the natural development is rheumatism, lumbago, and painful and fatal forms of kidney disease.

To best overcome this condition Dr. Chase worked out in his private practice a prescription which has come to be known as Dr. Chase's Kidney-Liver Pills, because of their combined action on these filtering organs. No treatment has ever proven so successful in awakening the action of the kidneys, liver and bowels, and thereby cleansing the system of all impurities. For this reason Dr. Chase's Kidney-Liver Pills have a world-wide reputation as the most thorough cure for rheumatism, lumbago, chronic indigestion and constipation.

Mrs. Alex. Gordon, Walkerton, Ont., writes: "A few years ago I suffered from kidney and liver trouble, with pains in my back. I had heard of Dr. Chase's Kidney-Liver Pills being good for this, so I commenced taking them. I had only taken a couple of boxes when the trouble was all removed."

Mrs. M. Nickol, 192 Milton street, Sarnia, writes: "I have found Dr. Chase's Kidney-Liver Pills an excellent remedy. I suffered considerably with kidney trouble and backache, but after I had taken five boxes of the Kidney-Liver Pills they gave me relief. Since then, which was about five years ago, I keep them on hand, and use them whenever I feel the need of them."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, all dealers, or Edmanston, Bates & Co., Limited, Toronto. Substitutes will only disappoint. Insist on getting what you ask for.

Spare Indian Lands for Returned Soldiers

There are many extensive tracts of valuable lands on Indian reserves which hitherto have lain idle. It became apparent that a new policy should be formulated whereby these lands might be utilized, and consequently the necessary legislation has been introduced to enable the Government to lease such lands for grazing or farming purposes or to cultivate them with or without the consent of the Indians.

Indian reserve lands are one of the sources of provision for soldier settlement. The Department of Indian Affairs lost no time in inaugurating prompt and comprehensive measures in collaboration with the Soldier Settlement Board with a view to have such lands placed at the disposal of that body as soon as possible.

Practically all the unsold surrendered Indian land has been turned over to the Board, and arrangements are being made to have further surrenders given by the Indians of lands which are considered suitable for soldiers' settlement. These lands are now being valued by representatives of the Board and the Department, who are acting in conjunction. The interests of the Indians in connection with these transactions are of course being thoroughly safeguarded, and they are in all cases receiving adequate compensation for their lands.

Greater Production.

In the Prairie Provinces a particularly vigorous "greater production" campaign has been conducted by the Department. An outstanding feature of this campaign was the establishment of Government greater production farms at the Blood, Blackfoot, Muscowpetung, Crooked Lakes, and Assiniboine Reserves. These farms comprise in all an area of 20,448 acres, and are equipped with the most modern machinery.

In the Prairie Provinces, also, the Department was enabled by special authority to grant farming and grazing leases, and the number of these issued has been very large. The area thus leased comprises in all some 255,000 acres.

It will be apparent from these statements that the Government is determined that Indian reserve lands shall not be neglected, and that measures of a thorough and effective character are being executed in furtherance of this policy.

The Story of an Auto and Cow

A cow, a cow pony and a man attached to the cow by a rope was the cause of what might have been a serious accident to the staff of one of our prominent local institutions while proceeding to the Calgary Fair by auto last week. The car was proceeding at a moderate speed and the occupants were thinking of what a great time they were going to have on the merry-go-round, feeding peanuts to the elephant and drinking colored lemonade when suddenly the cow, the man and the horse appeared on the horizon. Thinking that everything would be all right when that outfit was reached the leisurely pace of the car was not slackened, but when it reached the point where contact was not expected the cow suddenly decided that the opposite side of the road on which the man and the horse were riding was safest and the consequence was that the rope became taut and caught the auto right across the windshield, smashing it and tearing the top of the car rather badly. After the occupants of the car had taken time to examine themselves it was found that the driver was cut on the hands by the splintering glass and another received a bump on the head that caused him to forget his mathematical problems for a moment. The rider in the rear seat of the auto escaped and while no doubt it was known he was shaking in his shoes he gave the other fellows the merry ha-ha. The cow, the horse and the man while receiving a heavy jolt to their happy lives escaped injury so far as known.

Semi-Monthly Crop Report (Continued from Page 1)

lead there is a progressive shortening of the crop by drought. The same is true of the Alderside Branch though there are exceptions on carefully summer fallowed fields.

The condition of the tame hay crop has already been referred to. The central and northern parts of the Province will probably not have as large a surplus of native hay from the open areas as last year and more particularly Central Alberta. This is of importance in relation to the needs of the south. Already the stockmen are feeling a good deal of anxiety with regard to winter feed and a good many have come north as they did last year, looking for hay supplies.

The Department of Agriculture, likewise, has a number of men from the staff cruising the hay resources, particularly north of Edmonton, and information will be available shortly to inquirers.

The Province will not be able to take care of its live stock interests any better than it was last year and perhaps not quite so well. There will be a greater tendency to reduce stock than there was last year and there may be a considerable lowering of prices. The supply of grazing at the present moment is not good for either sheep or cattle and there is great anxiety among the live stock men. It is too early, however, to speak positively about feed resources. There may be considerable rough growth on the land that has been sown to crop just as there was last year and stockmen would be wise to hold off from turning stock on these lands hastily. There is likewise some chance that native hay lands may yield a good deal of winter feed also. The haying season is much longer than the season for grain harvesting, and a good supply of rain might develop both native hay and feed from the grain fields in the south as well as good fall grazing. Some of the live stock is rather thin but it will be all right if there is any reviving of pastures from now on. At the time of issue the weather of the Province seems to be broken and showery.

Does a Farmer Need a Truck?

THE farmer with a Ford Truck practically lives next door to the market.

He has a choice of markets. He becomes more independent.

He can market his goods when and where he pleases.

He sells his crop to the very best advantage.

And his hauling costs him less—in labor and money.

It is not only cheaper to haul with a Ford Truck than with a team and wagon, it is quicker, it is easier work.

Consider the time and labor the farmer can save with a Ford Truck. With a team the trip to town takes the better part of a day.

A Ford Truck makes the same trip in two or three hours.

When labor is so scarce, what farmer can afford to waste day after day of his valuable time?

Ford Trucks Complete with Body and Enclosed Cab

Ford One-Ton Trucks are now supplied, if desired, with standard truck bodies in two types, the Stake Body and the Express Body.

In both standard bodies the cabs may be supplied with or without doors as desired.

See these complete Ford Trucks. Consider the matter from every angle; the cost of feeding horses against the cost of running a Ford Truck; the time you lose on the road; the money you lose by being so far from the best markets. There is only one conclusion you can come to. You will have a Ford Truck.

Price (Chassis only)

Proposed Movement For Labor Reforms

Winnipeg.—A special dispatch to the Free Press from its Ottawa correspondent says:

"Important and far-reaching recommendations, designed to bring about the better relations between labor and capital, and to improve conditions, are incorporated in the report of the industrial relations commission, under Mr. Justice Mathers, who is expected to submit the findings to the government."

"The commission will recommend that a conference be held immediately with the provincial authorities, with a view toward bringing about the following reforms:

1. An eight-hour day throughout Canada.

2. A minimum wage for both male and female workers.

3. Collective bargaining, as prescribed by the railway unions.

The commission will further recommend that the Dominion government take steps, as soon as possible, for the formation of industrial councils on the Whitley plan, as adopted in England. It will urge that provisions be made for old-age pensions, that a system of unemployment insurance be inaugurated, together with insurance against sickness and disability.

Facing Expulsion

Expelling Unions for Calling Strike Without Sanction

Denver.—For participation in the general strike in Canada, several hundred members of the Brotherhood of Locomotive Firemen and Enginemen face expulsion from the organization, according to a discussion on the floor of the brotherhood's convention here. Arthur J. Lovell, vice-president of the brotherhood, who returned from Canada, where he was delegated to investigate conditions, said conditions in Canada at the time of his leaving were "terrible, very serious."

Money For Belgium

Reparations Committee Sanction Priority Payment of \$500,000,000

Paris.—The reparations committee of the peace conference has agreed to priority payment to Belgium of \$500,000,000 from the German indemnities, it was officially announced.

Small Cyclone At Empress

Calgary.—One child killed and several injured is the toll of a small cyclone which struck the outskirts of Empress, according to word which has just reached the city. The cyclone picked up a caboose in which were temporarily residing the entire family. The caboose, family and all were carried some distance away to a concrete, where the caboose was smashed to bits. The five-year-old child of the family was killed when a keg of nails fell on his head. Others of the family were injured. Several buildings on the outskirts of the town were demolished, but there were no other casualties.

Admiral Responsible For Sinking Of Ships

London.—Reuters learns that the authorities are communicating with Paris regarding action to be taken against Admiral Von Reuter, who with the officers and men of the German fleet is interned. It is confirmed that the Admiralty has learned that the scuttling of the fleet was entirely the work of the German admiral, and was not carried out as a result of instructions from Berlin.

Shipload of Aliens Going From U.S.

Charleston, S.C.—The transport Martha Washington was lying in the harbor here with about 2,000 Germans aboard, prepared to sail for Rotterdam soon, the exact time of departure depending on the arrival of 267 more from Fort Douglas, Arizona. Her passengers include enemy aliens arrested in all parts of the United States and interned for the period of the war.

Fish for London Poor

London.—The Salvation Army has received from the Canadian military stores 700 tons of frozen fish for distribution among the poor of London.

Rejoicing Over Advent Of Peace

Allied Soldiers Take Part in Celebrations

Copenhagen.—There was a remarkable spontaneous outbreak of rejoicing when the news that Germany had decided to sign the treaty reached Copenhagen. Many contradictory reports of the proceedings at Weimar kept the people in suspense until just before seven o'clock Monday night, when the guns of the British grand fleet and French warships in the roads shooting in salves, announced the news.

The crews of the vessels, both in the harbor and in the roads, started whistles and sirens going, and climbed the masts cheering lustily. Previously the allied warships had been cleaned for possible action.

Many of the seamen got shore leave and joined the throngs in the already crowded streets, singing and cheering. Long processions were formed, in which numerous flags of the allied nations were borne aloft. The singing of the Marseillaise and other patriotic songs was to be heard everywhere. French and British sailors marched to the national Danish monument commemorating the war of 1864, and decorated it with flowers.

The populace wildly cheered the allies, who had won Schleswig again for Denmark.

When darkness fell the warships were lighted up with incandescent bulbs and threw their searchlights over the city. The Copenhagen newspapers printed enthusiastic articles on Germany's decision to sign the treaty.

Madrid.—"It was with ineffable joy that I received the news of the certain advent of peace," said King Alfonso in his speech from the throne at the opening of the cortes. The king began his address by affirming the unalterable concord between Spain and the Vatican, and added:

"Spain's friendship for all nations is unchanged, except for the fact that the minister of Petrograd was withdrawn in consequence of events there."

Australia's Method

Will Not Allow Any Arrogant Force to Usurp Functions of Government of Commonwealth

Melbourne.—Outlining the political and industrial situation of the commonwealth, Acting Prime Minister Watt, in a public address, declared that the government will stand for the settlement of labor disputes by law and order under all circumstances rather than by the use of brute force.

"The people have expressed their will by the laws of the country," he added, "and they will not allow any force, however arrogant or powerful, to usurp the functions of the government or to challenge the forces of the government."

After reviewing the break which occurred in the labor party over the first conscription issue, and the resultant union of the forces of the National Labor party, led by William Hughes, the present premier, and the more numerous Liberal party, Mr. Watt said:

"The only safety for the country rests in the reaffirmation of this union, so that the two may be a national party in fact as well as in name."

Army of 400,000 for U.S.

Washington.—Without a vote, the senate adopted committee amendments to the army appropriation providing for an army of 400,000 men for the year beginning July 1.

The bill as passed by the house provides for an army of 300,000 and Secretary Baker had recommended that the total be placed at 500,000 officers and men.

Cattle Embargo is Still On

London.—Replying to a deputation urging the removal of the embargo on the importation of Canadian stocker cattle, the president of the board of agriculture admitted no ground for the embargo on account of disease, for the Canadian herds were the healthiest in the world, but if the board obtained the power of admission they must refrain from using it owing to the present labor difficulties.

Urged Exclusion Of Japanese

California Senator Characterizes Them as "Hun of the East"

Washington, District of Columbia.—Speaking before the house immigration committee, James D. Phelan, democrat, senator from California, declared that, for its own preservation, the time has come when the United States government must put up the bars against all Japanese immigration in the future.

The California senator urged that Japan could not reasonably resent such action by the United States as had been taken by the Tokio government toward China.

Characterizing the Japanese as the "hun of the east," the senator from California reiterated his charge that a Japanese syndicate had attempted to purchase 800,000 acres of the most fertile land in the San Joaquin Valley in California, and that the transaction was only halted when he complained to the state department.

Havoc Of Tornado

Cyclone Caused \$3,000,000 Damage at Fergus Falls

Fergus Falls, Minn.—State military authorities in charge of the tornado-stricken district of this city had compiled a list of 48 persons who are known to have died as a result of the cyclone. The officers in charge estimated the total death list at not less than 60.

Mayor Frankberg estimated that the city's financial loss from Sunday's tornado is not less than \$3,000,000.

"A careful survey of the city shows that the early estimate of a million and a half loss is too conservative, and that the actual loss is at least \$3,000,000," said the mayor.

"Forty per cent. of the resident district is in ruins, and a large portion of the business district has been demoralized."

Aliens Apply for Passports

Ottawa.—Many applications for passports are being received from persons of alien origin in the Dominion by the passport branch of the department of external affairs. The applicants include not only enemy aliens to whom passports are refused, but men from countries friendly to, or which have been fighting with the allies during the war. In the case of such latter classes, passports are granted only if they have been naturalized in the Dominion. Those who are not naturalized are referred to their particular consular agent. A great many applications are being received from Italians, Armenians, Macedonians, Poles, Ukrainians, and natives of various parts of Austria.

War Board Rules for U.S. Wheat

New York.—Julius Barnes, United States wheat director, made public a proclamation by President Wilson granting him full authority to regulate by license the exportation and importation of wheat and wheat flour for the purpose of stabilizing prices. Mr. Barnes said that the regulations he would put into effect were similar to those which have been enforced by the war trade board, which heretofore has exercised the functions delegated to him.

Germany Facing Railroad Strike

Berlin.—Germany is faced by a nation-wide railroad strike for higher wages. At Gortitz station, Berlin, service has been stopped in both directions. The Breslau service has been badly interrupted.

The government is negotiating in an endeavor to halt the strikes, which are largely the outcome of communist propaganda.

Hold on to Kaiser, Dutch Warned

Copenhagen.—The German officers' association has telegraphed the Dutch government, warning it not to deliver the former kaiser to the allies for trial, it was reported in dispatches received here. "We can protect the kaiser with our bodies, but we rely upon the generosity of the Dutch people," the message concluded.

German Government Exhorts Its People

Strike Leaders Remanded

Trials Over Sedition and Riots Will Commence Soon

Winnipeg.—William Ivens, R. B. Russell, Alderman A. A. Heaps, George Armstrong, R. E. Bray and Alderman John Queen, strike leaders arrested a week ago, will be tried in the city police court July 3 on charges of sedition, libel and seditious conspiracy. They were remanded by Magistrate Macdonald in special strike court on the request of A. J. Andrews, prosecutor for the Dominion government.

W. A. Pritchard, Sam Blumenberg, Matthew Charitonoff, Oscar Schopferle and Moses Almazoff were given a similar remand.

I. J. Murray, together with R. I. McMurray, will defend the prisoners now in Winnipeg. The men held at Stony Mountain penitentiary will be defended by M. Hyman. A conference of these three attorneys for the defence was held, when it was decided not to ask for a remand.

Permanent Cost Of Living Board Soon

Committee Report in Favor of the Appointment of Permanent Commission

Ottawa.—It is probable that the majority of the cost of living committee of the commons, which has been hearing evidence for some weeks, will report to the house in favor of the appointment of a permanent commission to be called in all probability the Inland Trade Commission. The proposal was discussed at a special meeting of the committee. G. B. Nicholson, chairman of the committee, is in favor of the suggestion.

A plan is to have three members of the committee, the chairman to receive a salary of \$8,000, and the two other commissioners \$7,000 each.

Turks Assault Greeks

Strong Forces Driving Them Back in Asia Minor

Paris.—The situation in Asia Minor is serious, according to official dispatches received by Reuters limited bureau here. These advices stated that the Turkish forces outnumber the Greeks four to one and threaten to drive them entirely out of Asia Minor. The Greek forces are reported to be retreating before the Turks, who are supplied with good artillery and plenty of ammunition.

Expect Coal to Be High

Detroit, Mich.—Coal at \$20 a ton is a very definite prospect for consumers in this district next winter, is the belief of wholesalers and retailers in close touch with the market. So serious is the menace of shortage in the market of both domestic and commercial fuel that it has brought forth action by the board of commerce, which body, at a special meeting, urged every householder and industrial plant to at once order their next winter's supply.

Mobs Attack Hamburg Factories

Copenhagen.—Serious rioting occurred at Hamburg, when mobs attacked food preserving factories, it being alleged that the bodies of dogs and cats had been found in them. The managers were dragged to the streets and roughly handled. The war provision department was also attacked and its offices were wrecked. The mob tried to disarm troops marching through the streets, and the latter opened fire, a number of persons being killed and wounded.

Invited to Moose Jaw

Moose Jaw.—The council passed a resolution which will be presented by local delegates at the union of Saskatchewan municipalities convention, inviting the convention to meet here next year.

Aviators Decorated

London.—It is announced that King George has conferred the order of Knight of the British Empire on both Captain Alcock and Lieut. Brown.

London.—President Ebert, Herr Bauer, and all the executives, have issued a proclamation to the German people, according to a wireless message from Berlin, announcing the conclusion of the peace and urging as the first pressing need the heeding of all efforts to its fulfillment.

"As far as it is possible to carry it out," says the proclamation, "the treaty must be carried out."

It declares faithful loyalty to those threatened with separation from the empire, and promises to intercede in their behalf, "as we would intercede for ourselves."

It concludes by exhorting the people to realize the need of work and faithfulness to duty for the redemption of the country.

Berlin.—The streets of Berlin have been scenes of rioting and plundering. Incited by speeches from agitators in Alexanderplatz, mobs attacked and robbed pedestrians and maltreated isolated soldiers. Troops sent to Alexanderplatz were fired upon by crowds in the streets and from the roofs of buildings. They finally succeeded in clearing the streets. Elsewhere in the city, bands of marauders robbed shops and attacked citizens, rifling their pockets.

The neighborhood of the Sietlin railway station, the Hochstrasse and the Barsstrasse was notably disorderly. Street cars were held up, while rioters searched the passengers' pockets and stole women's rings. Here, also, soldiers were beaten and shot were fired from roofs and windows, and the soldiers returned the fire.

Reparation For Fleet

May Yet Be Additions to Germany's War Bill

Paris.—The council has decided to send two notes to the president of the German peace delegation at Versailles, one regarding the actions of the Germans in Poland, in connection with a significant telegram intercepted by the Poles, and the other relative to the sinking of the German fleet in Scapa Flow.

The allies announce that they will demand reparation for the sinking of the fleet.

Fourteen Years After

Prince Rupert.—It is reported here that Simon Guna-poot, noted Indian renegade, wanted on a murder charge, and who has been hiding near the heavy waters of the Skeena River for the last 14 years, has given himself up to Constable M. Kelly, of the provincial police at Hazelton.

"Black Watch"—The Best Black Plug Chewing Tobacco on the Market

Poincare Going to Brussels

Brussels.—The date of the visit of President Poincare of France to Brussels has been fixed for July 21, which is Belgium's national fête day. He will be accompanied by Marshals Joffre, Foch and Petain, all of whom will attend a review of the Belgian army on July 22.

Demobilization of French

Paris.—It is reported the French army demobilization will be carried out with all possible speed, and that the classes of 1907, 1908 and 1909 will be mustered out the day after the treaty is signed.

A New Home Will Help You to Gain Greater Health, Happiness & Prosperity

Isn't that literally true?

Think about it a little.

Is your present home as large, sunny, warm, comfortable and attractive as it should be?

You know, of course, that your success in any kind of business depends very much upon your health and enthusiasm.

And many a house does not improve or even maintain the health and happiness of the people living in it. Does yours?

The people of this country—this part of it particularly—are entering just now into one of the most promising series of years we have ever seen.

And what each family gets out of it depends upon how much they are prepared to produce.

Make your home what it should be NOW so that you and your family can do its best and thus secure the best rewards.

Call and see plans we have here for different types of homes. Let us help you THINK about this home question in a practical way.

DIDSBURY

"WE SELL BUILDINGS"

PAUL KIMBALL, VICE-PRESIDENT AND MANAGER.

Neapolis News

Dry weather and cut worms are still the subject of the day.

Mr. Hector Duncan returned on Thursday from a short visit to Saskatchewan.

Mr. and Mrs. S. Sherk are entertaining visitors from Three Hills this week. Several Neapolites attended the Calgary Fair.

Mr. R. C. Oldham returned on Sunday from a trip to Nebraska, U. S. A.

Several of the young folks went to Carstairs on Sunday.

Mrs. Jack Hains has been under the doctor's care for the last few days.

The Neapolis baseball team will be able to compete with any team after a few more practices. Get busy!

Mr. and Mrs. Frank Reek now ride in a brand new Willys-Overland car. Poor Henry is sidetracked.

Mr. and Mrs. Stewart Tighe left the latter part of last week for a trip to the coast.

Miss Louise Callbeck left on Friday for her home at Prince Edward Island after finishing a successful term as teacher at the Neapolis school.

Several farms have changed hands around here recently, not knowing the names of the several purchasers we are unable to mention any.

We understand there will be an Institute picnic some time in the near future at the Gore school. Hurry up folks and let us know when it will be so we can have our running shoes on.

WESTERDALE METHODIST CHURCH
Services every Sunday.

Morning, 11 o'clock. Evening, 8.30.
Sunday school at 12 o'clock.
All are welcome.

Pastor—Rev. H. Brooke

AROUND THE TOWN

Ralph Wilson came back from Vancouver last week where he has been spending a short holiday since coming back from France.

Mr. Harry Paul, of Calgary, late of the 187th Batt., has accepted a position on the staff of the PIONEER as assistant to the Editor and foreman of the mechanical department.

Mr. and Mrs. Lee Sanderman will give a barn dance to celebrate the opening of their big new barn on July 18th. A good lunch will be served and everybody is cordially invited. The Clemms orchestra will supply the music. 2p

Miss Ara Weber who has been head bookkeeper and stenographer for the Western Mutual Fire Insurance Company since its organization has resigned her position with that Company and has taken a position in the insurance branch of the U. G. G. at Calgary.

Captain Frank Drummond, of Montreal, who has been visiting F. M. Henderson for the past week, was in Didsbury last Thursday on his way east. Captain Drummond is a brother of Mr. Huntley Drummond who succeeds Sir George Perley as Canadian High Commissioner at London.

Privates Alf. Weber who joined up with the 187th Batt. and Cecil Studer both returned from overseas on Thursday last. They both look well and are in splendid condition. The PIONEER heartily welcomes their return to us and wishes them every success on their return to civilian life.

On Friday, July 11, Rugby Women's Institute and Rugby U.F.A. Local will hold a picnic at Mr. Chas. Brown's, four miles west from Westcott. W. J. Elliott of the United Grain Growers will give an address. Lunch served at 1 p.m. sharp. Everybody welcome. Ladies bring lunch baskets.

The Mennonite camp meeting is being well attended and great interest is being shown in the work. The meetings will be continued till Monday next.

A big gang of men are now at work on the new opera house and office buildings after being held up for a week or two for material, Emerson Morrison, the contractor, thinks that he will have the buildings completed about September 1st. The bricklayers commenced work on Tuesday.

Rev. D. C. and Mrs. Eby of the M. B. C. church left on Monday for Turkey where they will again take up their missionary work which was suspended on account of the war. There was an immense crowd at the C. P. R. depot to wish them a safe journey and every good thing. They were extremely well liked by all classes while they have been stationed here who will regret their departure but who will wish them success.

Bob Martin while in Banff a few days ago received word that his brother, John M., who was living in Vancouver, had died suddenly of heart disease. Deceased visited his brothers here a few years ago. This is the second death in the family in about six weeks.

Mr. W. H. Brown, of the Land Titles office, Edmonton, was a camp meeting visitor for a short time this week and incidentally called on the editor for his annual chat. Mr. Brown states that they had another fine rain in Edmonton on Monday.

Pte. Charlie Mortimer returned from France on Sunday. Charlie joined up with the 187th but was transferred to the 31st when they arrived overseas. He was wounded in the wrist and ankle at the battle of Paschendale but recovered sufficiently to again return to the front and was in several other engagements. Welcome back.

The Westcott Cemetery Board wish to thank all those who assisted them both physically and financially with the cemetery. The work was done well and about \$35 was donated for improvements. The Board requests those who have not paid 10¢ to 15¢ so as early as possible so that everything may be cleaned up.

Mr. and Mrs. W. G. Liesemer and family start on an extended automobile trip to Spokane, Portland, Seattle, Vancouver, and other points on Thursday, and they expect to be gone about a month. This is a splendid way to take a holiday, and everyone will wish them a safe journey with lots of enjoyment.

Russell Berscht had great success with his little Shetland pony "Gipsy Bell" at the Calgary Fair last week. There were eighteen entries in this class and 15 shown. He won the red ribbon in the saddle class and three seconds; one second for children's turnout, one for pony in harness, and one for combination pony. Considering the great competition in the show ring in this class the fact that he led them all is to be greatly commended.

A PIONEER advertisement and the honesty of a boy was the means of finding a ten dollar bill which was advertised as being lost in our last issue. The results of advertising in the PIONEER could not be more plainly demonstrated as money is something that cannot be traced after it is once lost and is so easily disposed of. If our advertiser had not made his loss known through our advertising columns he would still be minus his ten dollar bill. The merchant who does not advertise is minus a good many ten dollar bills.

Arrangements are now completed for the Westcott Sports which will be held on the Jacobson farm, one mile west and one and a half miles south of Westcott on July 23rd. A fine program of races has been arranged comprising green trot, ladies' quick hitch, free-for-all running race, ladies' half-mile race, pony, relay, and barrel races, pulling stakes and other novelty races. A backing contest will also be held. A full list of running, jumping and novelty races for men, women and children will be given. The admission will be 25c for all over the age of 12 years. Booths will be on the grounds to supply ice cream, lemonade, etc. A dance will be held at night in C. L. Bellamy's barn. Everybody come. 2c
